

Pablo Belló

pablo@mzzdev.com · mzzdev.com · Spain

Full-stack developer with 2+ of experience building web applications in real-world business environments. Specialized in React and Java, combining a strong backend with clean, usable, and aesthetic interfaces. Focused on experimental, user-centered design and high-quality digital experiences.

EXPERIENCE

Teknei, Full-Stack Developer

2024 - Present

- Built backend services and secure APIs for government infrastructure platforms.
- Delivered enterprise Java/Spring Boot applications from initial development to production.
- Implemented user interfaces with React and internal component libraries for both end users and internal tools.
- Integrated with an existing enterprise CI/CD pipeline to manage controlled deployments.

PROJECTS

- Tool for quick code sharing and visualization.
- Interface prototypes and experimental design work.
